Control4 Announces the Release of the CA-1 Automation Controller

Priced at \$350 U.S. MSRP, the CA-1 enables new opportunities for Control4 dealers to offer smart home experiences to a broader market via home builders, MDU developers, and hotel operators.

SALT LAKE CITY--(BUSINESS WIRE)-- [Control4](#) Corporation (NASDAQ: CTRL), a leading global provider of smart home solutions, announces the immediate availability of the Control4® CA-1 Automation Controller. The CA-1 enables Control4 Dealers to provide an orchestrated smart home experience for homeowners interested in lighting, temperature control, and security. At \$350 U.S. MSRP, the new controller is designed to appeal to homebuilders, MDU developers, and hoteliers, giving them a way to differentiate with the inclusion of the most sought-after smart home experiences.

and at a price-point that fits all of our homes."

Tailored specifically for smart home projects that desire lighting, comfort, and/or security, the CA-1 Automation Controller includes Ethernet, WiFi, Zigbee, and serial communication, leveraging the large Control4 database of thousands of third-party devices to ensure easy integration and interoperability. Using the optional Z-Wave module, sold separately at \$70 U.S. MSRP, enables the CA-1 to be compatible with a selected set of Z-Wave control devices including door, window, water, flood, and temperature sensors, electrical outlets, and dimmer outlet modules. The CA-1 also features Power-over-Ethernet (PoE) so it can be installed virtually anywhere with a single network cable.

"The CA-1 utilizes the industry-proven Control4 platform and broad device ecosystem so our dealers can immediately succeed with the skills, resources, and expertise that they already have," added Plaehn. "This is not a dialed-down version of the Control4 OS nor a compromise; this is a new category of automation controller designed to meet the connected home demands of home builders, building developers, and their buyers."

Expanding the Control4 controller lineup, the CA-1 complements the entertainment-focused EA Series controller line, used in projects of all sizes and complexity. Using the CA-1, home builders and homeowners can now start with smart lighting, safety, and security via Control4.

"The emerging range of smart locks, thermostats, lights, and cameras available today have certainly raised consumer awareness for the promise of the smart connected home," said Martin Plaehn, Chairman and CEO, Control4.

"Homeowners as well as home builders and building developers are looking for more than a just collection of independent, smart devices. Our new CA-1 and industry-leading Control4 OS deliver that needed capability and customer experience - orchestrating all of the smart devices in a home."

"Demand for home automation is growing and home buyers expect smart experiences in the houses we are building," said Vincent Grabowski, Vice President of Construction from Saddle-Tree Homes in Colorado Springs. "But if we just add individual smart devices here and there, the homeowner experience quickly becomes disjointed or incomplete. Control4 and its new CA-1 provides a far more comprehensive solution and cohesive connected home experience -

The new Control4 CA-1 comes in white for discrete wall, closet, and shelving installations. The CA-1 is available and shipping today, globally, at \$350 U.S. MSRP with a two-year warranty. The CA-1 will be featured at Integrated Systems Europe in Amsterdam from February 6 to 9, 2018 in the Control4 stand 10-N130.
